

OPEN EDUCATIONAL RESOURCE

Course Code: CSE202

Course Title: OBJECT ORIENTED PROGRAMMING

L.T.P: 3.0.2

Credit: 4

Course Code	Course Title	Unit mapped	Broad topic	OER Type	Title of OER	Source URL
CSE202: Object Oriented Programming		Unit 1	Classes and functions	Reading material (online tutorial), Practice Questions	C++ Programming Language	https://www.geeksforgeeks.org/functions-in-cpp/?ref=lbp
		Unit 2	Pointers, Reference Variables, Arrays and Strings	Reading material (online tutorial), Practice Questions	C++ Programming Language	https://www.geeksforgeeks.org/pointers-and-references-in-c/?ref=lbp
		Unit 3	Constructors, Destructors, File Handling	Reading material (online tutorial), Practice Questions	C++ Programming Language	https://www.geeksforgeeks.org/file-handling-c-classes/?ref=lbp
		Unit 4	Operator Overloading, Type Conversion, Inheritance	Reading material (online tutorial), Practice Questions	C++ Programming Language	https://www.geeksforgeeks.org/operator-overloading-cpp/?ref=lbp

	Unit 5	DMA, Polymorphism	Reading material (online tutorial), Practice Questions	C++ Programming Language	https://www.geeksforgeeks.org/cpp-polymorphism/?ref=lbp
	Unit 6	Exception Handling, Templates, STL	Reading material (online tutorial), Practice Questions	C++ Programming Language	https://www.geeksforgeeks.org/exception-handling-c/?ref=lbp
